PRESS RELEASE

FOR IMMEDIATE RELEASE

Cube Automation acquires Oceatec

[Tracadie, January-13-2020] – Cube Automation (Tracadie, N.-B.) announced earlier this week the acquisition of the assets of Oceatec (La Pocatière, QC), a company specializing in the design of automated equipment for the food processing and seafood industry.

«This acquisition will allow the our company to increase its presence in Quebec and offer its customers new technologies, said Roch Chiasson, president of Cube Automation. By adding this anchor in Quebec, we aim to better serve our customers and develop new market segments »

Founded 25 years ago, **Cube Automation** has been the leading provider of automation solutions for the seafood processing industry in Eastern Canada. Already having a strong presence in eastern Quebec, the company also offers its services to a variety of industry sectors, including those related to the integration of production lines, automation, robotics and the implementation of industry 4.0 solutions.

For 15 years, Oceatec has been working in the mechanical design of automated equipment, especially for the processing of seafood. Over the years, through the development of

breakthrough innovations, the company has gained a dominant position in the processing sectors of sea urchins and sea cucumbers.

«By joining the Cube Automation team, we will have access to state-of-the-art automation and programming expertise," says Pierre Patenaude of Oceatec. For our clients in Quebec, Cube Automation's service offering will add value in the development of innovative solutions for the automation of industrial processes. »

In addition to its offices in Tracadie and Moncton, Cube Automation now has a business space in La Pocatière, Quebec, at Oceatec's facilities, which remain at the same address.
